Note: The stated length of these brackets is the length the support extends under the countertop overhang. This product is useful on applications allowing for about four inches of support structure to tie into (ie. knee walls, half-walls & modified cabinets). For full length of the Carrier Countertop Brace please add 4.125" to the stated length in the Product description.

About Hidden Countertop Brackets:

Without a standard gusset to provide additional support, it is suggested that countertops supported by these brackets be given the additional support of a counter or knee wall to reduce load deflection.
