

# Using your Emotion Lighting Products

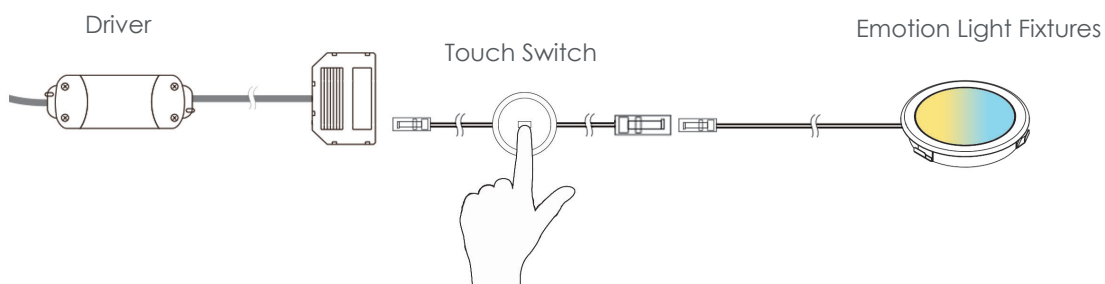

## 1 For static color temperature fixture:

By using a standard driver and the included cool white cable, you can easily switch color temperatures from 3000K to 6000K on one fixture.

## 2 Touch Switch:

By using the optional Touch Switch, you can dim the fixtures and also gradually change color temperatures ranging anywhere between 3000K and 6000K.

## 3 Advanced Driver:

By using the Emotion Driver, it allows for a full range of products, including Remote Control and Bluetooth Smart Phone App Connectivity. Configure your own switching such as Infrared or Motion Sensor.
